

Project Report

During this project, I developed a small hotel booking website called *EasyStay*. It includes several pages such as Home, About, Contact, and Booking. I used HTML and Bootstrap to create a clear layout, responsive design, and consistent structure. I added forms with basic validation so that users cannot submit empty or incorrect information. I also learned how to use JavaScript and jQuery to make the website interactive — for example, to filter rooms by type, show and hide elements, and add small animations. While working on this project, I improved my understanding of event handling, DOM manipulation, and CSS styling. I also learned how to make the website look more colorful and professional while keeping it simple and user-friendly.

Home page

```
<main class="container my-5">
  <div class="row align-items-center">
    <div class="col-lg-6">
      <h1 class="display-5">Comfortable stays. Simple booking.</h1>
      <p class="lead">Find a cozy room, check availability and book in minutes. Great prices for short stays!</p>
      <a href="rooms.html" class="btn btn-primary btn-lg me-2">View Rooms</a>
      <a href="booking.html" class="btn btn-outline-primary btn-lg">Book Now</a>
    </div>
    <section class="text-center my-5">
      <h2 id="welcomeText">Explore Our Rooms</h2>

      <div class="position-relative mx-auto" style="max-width:600px;">
        
        
        

        <div class="d-flex justify-content-between mt-3">
          <button id="prevRoom" class="btn btn-outline-primary">Previous</button>
          <button id="nextRoom" class="btn btn-outline-primary">Next</button>
        </div>
      </div>
    </section>
```

Rooms

```
<main class="container my-5">
  <div class="d-flex justify-content-between align-items-center mb-4">
    <div>
      <button id="filterAll" class="btn btn-sm btn-outline-secondary me-2">All</button>
      <button id="filterDeluxe" class="btn btn-sm btn-outline-secondary me-2">Deluxe</button>
      <button id="filterStandard" class="btn btn-sm btn-outline-secondary">Standard</button>
    </div>
  </div>

  <div class="row g-4" id="roomsGrid">
    <div class="col-md-6 col-lg-4 room-card deluxe">
      <div class="card">
        
        <div class="card-body">
          <h5 class="card-title">Deluxe Room</h5>
          <p class="card-text">King bed, city view, free breakfast.</p>
          <div class="d-flex justify-content-between align-items-center">
            <span class="fw-bold">$120 / night</span>
            <div>
              <button class="btn btn-sm btn-primary me-1 view-details" data-title="Deluxe Room" data-img="img/room1.jpg">View Details</button>
